

Start

Open this page every time you sit down to work. Then pick one other PDF.

1. Write what "done" means in one sentence.
2. Fill **checklist.pdf**. Blank lines mean you are not ready.
3. Pick one track:

- New project → **new.pdf**
- Existing project → **inherited.pdf**
- Questions only, no code → **research.pdf**

1. Stay on that track until the work is finished or you switch on purpose.
2. Give the AI the context/ folder. You keep the PDFs.
3. You review the result. You decide commit and push.

Do not open the AI until steps 1–3 are done.
